Thank you all for the ideas.
I too have figured out a different solution.

The plugin which I mentioned about is "Microsoft Save as PDF" offered by Microsoft Corporation. You would find it here:
http://www.microsoft.com/downloads/details.aspx?FamilyID=4d951911-3e7a-4ae6-b059-a2c079d87f41&displ

Once this converter is added to MS Office, the ActiveX will support the functionality too. You must specify the required file format's value in the SaveAs method. A list of all supported formats and their values can be found in http://msdn.microsoft.com/en-us/library/9523f1f0%28office.12%29.aspx

P.S find the attached vi...
